# GEST Asia 2018

## 7-8 December, Hong Kong

### Invitation message from the Organizing Committee to participants

Dear colleagues and friends,

It gives us great pleasure to invite you to participate in GEST Asia 2018, which will be held on December 7-8<sup>th</sup> in Hong Kong.

Global Embolization Symposium and Technologies (GEST) is a global leading scientific congress addressing all aspects of embolotherapy and cancer care. GEST Asia is a part of GEST and is designed especially to cater for the specific needs of the interventionalist and the Asian patient population. The past two meetings have brought together hundreds of experts, physicians and industrial partners from around the world with resounding success.

The program covers the finest elements of GEST, including comprehensive educational sessions, original scientific research, and cutting-edge developments in the field.

Through lectures by esteemed speakers, a highly selective program designed by a distinguished Scientific Committee will be delivered to cover all aspects of embolization. From tools to technique, from head to toe, our program will instill new concepts for treatment, expert tips & tricks on technique, proven strategies for troubleshooting, and keep you updated on the latest advancements and technologies.

Join us in this international conference where an exchange of experiences and ideas, and establishment of collaborative relationships can take place.

We invite you to mark your diary, submit an abstract and register for GEST Asia 2018 (<http://www.gestasia2018.com>). Register before September 15<sup>th</sup> for Early Bird.

Don't miss this exceptional opportunity to present your research and to widen your knowledge on embolotherapy, new techniques and devices, best practices and up-to-date evidence.

Looking forward to meeting you.

Yours sincerely,  
The Organizing Committee of GEST Asia 2018
