GEST Asia 2018

7-8 December, Hong Kong

19th August 2018
Professor Kimihiko Kichikawa
President
Japanese Society of Interventional Radiology

Dear Professor Kichikawa,

Re: GEST Asia 2018

Global Embolization Symposium and Technologies (GEST) is a global leading scientific congress addressing all aspects of embolotherapy and cancer care. GEST Asia is a part of GEST, designed specifically to cater for the needs of the Asian population and is organized by a strong scientific committee consisting Asian leaders in collaboration with GEST directors.

This year, GEST Asia will be held on December 7-8th in Hong Kong. The program will include comprehensive educational sessions, original scientific research, and cutting-edge developments in the field.

Delivered by renowned experts, the lectures will cover all aspects of embolization – including tools, technique, trouble-shooting strategies, tips & tricks, together with the latest technologies and treatment concepts. GEST Asia aims to widen the participant's knowledge and keep them up-to-date on the current practices of embolotherapy, as well as provide a platform for research presentation, discussion and collaboration.

We ask for your kind assistance in promoting this important event to your members for their enrollment. We have sent to you a separate email invitation to the members of your society, with a poster attached, please kindly help to forward our invitation email together with the poster attachment to the members of your society. We will also appreciate if you can post a link to our congress website (<http://www.gestasia2018.com>) on your society's website to facilitate easy access for more detailed information.

The contact person for this event is Miss Sabrina Chan, Tel: (852) 35054094, Email: gestasia2018@gmail.com

Thank you very much.

Yours sincerely,
The Organizing Committee of GEST Asia 2018
