Third Announcement

Program Highlights

Lectures, Panel Discussion and Case Presentation

Techniques of transarterial treatment for HCC

- Angio-architecture and hemodynamic in HCC, including angiographic classification in HCC, intra and extrahepatic supplies, portal venous hemodynamic, arteriovenous and arterioportal shunts
- Superselective catheterization for transarterial treatment: Technical pitfalls
- Transradial approach for transarterial treatment
- Dosimetry and treatment planning for radioembolization of HCC

Treatment for advanced HCC

- Updates of targeted therapy for HCC
- Combined targeted therapy and transarterial treatment for advanced HCC
- Immunotherapy for HCC
- Combined immunotherapy and transarterial treatment for advanced HCC
- Combined intra-tumoral immunotherapy and transarterial treatment for advanced HCC

IRE for pancreatic cancer

- Advances and updates in the clinical application of irreversible electroporation (IRE) in pancreatic cancer

- Technical considerations and pitfalls in IRE for pancreatic cancer
- The advantage of open surgical approach for IRE of pancreatic cancer

Thermal ablation of thyroid

- Technical advances and outcome of radiofrequency ablation for malignant thyroid lesions
- Thermal ablation for Grave's disease: Technical considerations and outcomes
- Ablation of parathyroid glands: Technical considerations and outcomes

Case Demonstrations of How I Do It

- US-guided RFA of HCC with Artificial Ascites
- Percutaneous microwave ablation of complex liver tumor
- Superselective catheterization for transarterial treatment of HCC
- Percutaneous IRE for pancreatic cancer
- Open surgical approach for IRE of locally advanced pancreatic cancer
- RFA for malignant thyroid lesions
- Radioactive seeds for treatment of metastatic brain tumor and malignant glioma
- Percutaneous microwave ablation of complex renal tumor
